

## WHAT?

Grace Church has before it a once-in-a-generation opportunity. In 2015 our pipe organ was damaged beyond repair by a heavy rainstorm. As a result our new pipe organ, Taylor and Boody's Opus 77, will be located in the chancel which was added after the Church burned in 1895. We will enlarge the chancel's floor space, add seating, provide more room for the baptismal font, and raise and finish the ceiling with a beautiful design in wood marquetry. The resulting acoustic will be a rich, warm sound that enhances choir and congregational singing. Placing the new Organ in the chancel, will re-open the gallery which has been covered by organ pipes since 1959. Sunlight from the Tower window will once again flood the nave as was originally designed.

The new Organ will enhance the outreach and mission of Grace Church as its doors open wide to the Keswick community, serving as a venue for concerts, recitals and performances.

## WHY?

Change and growth have enlarged the Grace Family presence in the Community and, in many ways, extended its outreach to others who have found new life and new light as a result. Our colonial founders would marvel at Grace's community outreach and would be proud of what their little clapboard church has become in and around Keswick.

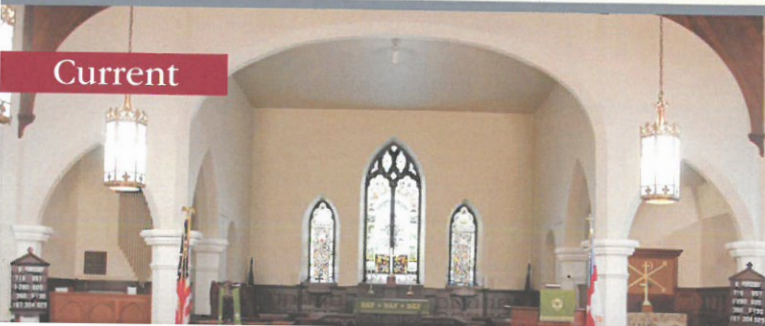

## HOW?

The total cost of the historical restoration, acoustical enhancements and new organ is projected at \$1.6 million. More than half the cost has already been raised from devoted parishioners, friends, Grace's Planned Giving Fund and insurance proceeds. We hope to reach our goal by the time the Organ is installed and celebrate God's grace to our Congregation and Community.

# DREAM. GIVE. GROW.

The Grace Family once again has a major opportunity to expand and enrich its outreach to an even broader Community, this time through music and related artistic programs that will promote spiritual growth and cultural appreciation to all who seek it. We pray for success and ask you to join us in that prayer and in achieving this ambitious goal.
